## Setup Guide Using Mi WiFi App

### When setting up as a primary router:

1. Power on the router, connect the Ethernet (RJ45) cable to the Internet port seen behind the router and switch it on.

Download the Mi WiFi app from Google Playstore or Apple App Store. *Alternatively, you can also scan the QR code available below or on the product box or inside the product manual.*

2. Open the Mi WiFi app. Sign in to your Mi account. Once signed in, the app allows you to search for the Mi WiFi router.

Once detected, 'Set up now' button will be active to proceed further.

5. Entering your ISP provided credentials
  - a. If you remember your ISP provided username and password, please enter the required details and tap on 'next'

- b. Else, you can also import the settings from your previous router. Follow the steps described in the image below and click on 'Import from existing router'.

Note: In case your connection type is DHCP, you don't have to enter the ISP username/password or import the configuration.

## Setup Guide Using Mi WiFi App

6. Enter your Wi-Fi network name and password.

Please note: If you want the same password to be used for router admin control, please select 'set as router admin password as well' and click on finish. **Happy browsing!**

The screenshot shows the 'Connect to the internet' screen in the Mi WiFi App. It features a blue header with a back arrow and the title 'Connect to the internet'. Below the header, there are three input fields: 'Network name' with the value 'Xiaomi\_Home', 'Password' with a masked password '\*\*\*\*\*', and 'Admin password' with the value 'Enter admin password'. Each password field has an eye icon to toggle visibility. Below these fields is a radio button option labeled 'Set as router admin password as well'. At the bottom of the form is a large, rounded 'Finish' button.

2. Upon selection of Wired Repeater Mode,
  - a. Connect the WAN/ Internet port of Mi WiFi Router 3C with the LAN port of your primary router using a LAN (Ethernet/ RJ45) cable, while the WAN/ Internet port of primary router is connected to the ISP.
  - b. Once done, provide 'Network Name' and 'Password' and click on 'Finish'. **Happy Browsing.**

The screenshot shows the 'Connect to the internet' screen in the Mi WiFi app. At the top, there is a blue header with a back arrow and the text 'Connect to the internet'. Below the header, there are two input fields: 'Network name' with the value 'Xiaomi\_Test' and 'Password' with masked characters and a visibility toggle icon. A green checkmark icon is next to the text 'Set as router admin password as well'. At the bottom, there is a large, rounded 'Finish' button.

Please note: Ethernet cable is not a part of this package.
